

Dear RGGI Board of Directors,

Since 2009, Regional Greenhouse Gas Initiative (RGGI) states have saved \$5.7 billion as well as pain, suffering and days lost from work and school.

You are now determining the next phase of the carbon cap-and-invest program. Unfortunately, the proposed carbon cap doesn't go far enough in protecting health from harmful air pollution and the effects of climate change. Under the proposed cap, the most vulnerable -- children, elderly, low-income communities and communities of color -- will be placed at risk.

The RGGI must ensure 5 percent carbon pollution reductions annually from 2020 levels through 2030, and RGGI funds must be heavily invested in the vulnerable communities that feel the most harm from air pollution and climate change.

Given the dismantling of our climate and air protections at the federal level, we need strong state level action now. As a resident of a RGGI state, I call on you to lead the way.

Sincerely,

Thomas Reynolds  
66 New Salem South Rd  
Voorheesville NY 121864927

Unfortunately, the proposed carbon cap doesn't go far enough in protecting health from harmful air pollution and the effects of climate change. Under the proposed cap, the most vulnerable -- children, elderly, low-income communities and communities of color -- will be placed at risk.

The RGGI must ensure 5 percent carbon pollution reductions annually from 2020 levels through 2030, and RGGI funds must be heavily invested in the vulnerable communities that feel the most harm from air pollution and climate change.

Given the dismantling of our climate and air protections at the federal level, we need strong state level action now. As a resident of a RGGI state, I call on you to lead the way.

Sincerely,

Charlene V. Maker  
125 S Of Commons Rd  
Little Compton RI 028371549

---

Dear RGGI Board of Directors,

Since 2009, Regional Greenhouse Gas Initiative (RGGI) states have saved \$5.7 billion as well as pain, suffering and days lost from work and school.

You are now determining the next phase of the carbon cap-and-invest program. Unfortunately, the proposed carbon cap doesn't go far enough in protecting health from harmful air pollution and the effects of climate change. Under the proposed cap, the most vulnerable -- children, elderly, low-income communities and communities of color -- will be placed at risk.

The RGGI must ensure 5 percent carbon pollution reductions annually from 2020 levels through 2030, and RGGI funds must be heavily invested in the vulnerable communities that feel the most harm from air pollution and climate change.

Given the dismantling of our climate and air protections at the federal level, we need strong state level action now. As a resident of a RGGI state, I call on you to lead the way.

Sincerely,

Chris McGinn

Under the proposed cap, the most vulnerable -- children, elderly, low-income communities and communities of color -- will be placed at risk.

The RGGI must ensure 5 percent carbon pollution reductions annually from 2020 levels through 2030, and RGGI funds must be heavily invested in the vulnerable communities that feel the most harm from air pollution and climate change.

Given the dismantling of our climate and air protections at the federal level, we need strong state level action now. As a resident of a RGGI state, I call on you to lead the way.

Sincerely,

George Carter

---

Dear RGGI Board of Directors,

Since 2009, Regional Greenhouse Gas Initiative (RGGI) states have saved \$5.7 billion as well as pain, suffering and days lost from work and school.

You are now determining the next phase of the carbon cap-and-invest program. Unfortunately, the proposed carbon cap doesn't go far enough in protecting health from harmful air pollution and the effects of climate change. Under the proposed cap, the most vulnerable -- children, elderly, low-income communities and communities of color -- will be placed at risk.

The RGGI must ensure 5 percent carbon pollution reductions annually from 2020 levels through 2030, and RGGI funds must be heavily invested in the vulnerable communities that feel the most harm from air pollution and climate change.

Given the dismantling of our climate and air protections at the federal level, we need strong state level action now. As a resident of a RGGI state, I call on you to lead the way.

Sincerely,

Freya Goldstein

Given the dismantling of our climate and air protections at the federal level, we need strong state level action now. As a resident of a RGGI state, I call on you to lead the way.

On a more personal note, having spent my career as a primary care physician, and as a Medical Group and Health System leader, I have seen too many people struggle just to take a full breath. Whether it's the easy access to cigarettes, or the all too many dirty air days we have in Delaware, these are things we need to have the courage to address.

Sincerely,

Alan Greenglass MD

Under the proposed cap, the most vulnerable -- children, elderly, low-income communities and communities of color -- will be placed at risk.

The RGGI must ensure 5 percent carbon pollution reductions annually from 2020 levels through 2030, and RGGI funds must be heavily invested in the vulnerable communities that feel the most harm from air pollution and climate change.

Given the dismantling of our climate and air protections at the federal level, we need strong state level action now. As a resident of a RGGI state, I call on you to lead the way.

Sincerely,

Joyce McDonald

---

Dear RGGI Board of Directors,

Since 2009, Regional Greenhouse Gas Initiative (RGGI) states have saved \$5.7 billion as well as pain, suffering and days lost from work and school.

You are now determining the next phase of the carbon cap-and-invest program. Unfortunately, the proposed carbon cap doesn't go far enough in protecting health from harmful air pollution and the effects of climate change. Under the proposed cap, the most vulnerable -- children, elderly, low-income communities and communities of color -- will be placed at risk.

The RGGI must ensure 5 percent carbon pollution reductions annually from 2020 levels through 2030, and RGGI funds must be heavily invested in the vulnerable communities that feel the most harm from air pollution and climate change.

Given the dismantling of our climate and air protections at the federal level, we need strong state level action now. As a resident of a RGGI state, I call on you to lead the way.

Sincerely,

James Recht MD

---

Dear RGGI Board of Directors,

Since 2009, Regional Greenhouse Gas Initiative (RGGI) states have saved \$5.7 billion as well as pain, suffering and days lost from work and school.

You are now determining the next phase of the carbon cap-and-invest program. Unfortunately, the proposed carbon cap doesn't go far enough in protecting health from harmful air pollution and the effects of climate change. Under the proposed cap, the most vulnerable -- children, elderly, low-income communities and communities of color -- will be placed at risk.

The RGGI must ensure 5 percent carbon pollution reductions annually from 2020 levels through 2030, and RGGI funds must be heavily invested in the vulnerable communities that feel the most harm from air pollution and climate change.

Given the dismantling of our climate and air protections at the federal level, we need strong state level action now. As a resident of a RGGI state, I call on you to lead the way.

Sincerely,

Michelle Babian  
1020 Warburton Ave 8c  
Yonkers NY 107011200

Unfortunately, the proposed carbon cap doesn't go far enough in protecting health from harmful air pollution and the effects of climate change. Under the proposed cap, the most vulnerable -- children, elderly, low-income communities and communities of color -- will be placed at risk.

The RGGI must ensure 5 percent carbon pollution reductions annually from 2020 levels through 2030, and RGGI funds must be heavily invested in the vulnerable communities that feel the most harm from air pollution and climate change.

Given the dismantling of our climate and air protections at the federal level, we need strong state level action now. As a resident of a RGGI state, I call on you to lead the way.

Sincerely,

rob fursich

Hartsdale NY 105301348

---

Dear RGGI Board of Directors,

Since 2009, Regional Greenhouse Gas Initiative (RGGI) states have saved \$5.7 billion as well as pain, suffering and days lost from work and school.

You are now determining the next phase of the carbon cap-and-invest program. Unfortunately, the proposed carbon cap doesn't go far enough in protecting health from harmful air pollution and the effects of climate change. Under the proposed cap, the most vulnerable -- children, elderly, low-income communities and communities of color -- will be placed at risk.

The RGGI must ensure 5 percent carbon pollution reductions annually from 2020 levels through 2030, and RGGI funds must be heavily invested in the vulnerable communities that feel the most harm from air pollution and climate change.

Given the dismantling of our climate and air protections at the federal level, we need strong state level action now. As a resident of a RGGI state, I call on you to lead the way.

Sincerely,

Roxy Gray

Dear RGGI Board of Directors,

Since 2009, Regional Greenhouse Gas Initiative (RGGI) states have saved \$5.7 billion as well as pain, suffering and days lost from work and school.

You are now determining the next phase of the carbon cap-and-invest program. Unfortunately, the proposed carbon cap doesn't go far enough in protecting health from harmful air pollution and the effects of climate change. Under the proposed cap, the most vulnerable -- children, elderly, low-income communities and communities of color -- will be placed at risk.

The RGGI must ensure 5 percent carbon pollution reductions annually from 2020 levels through 2030, and RGGI funds must be heavily invested in the vulnerable communities that feel the most harm from air pollution and climate change.

Given the dismantling of our climate and air protections at the federal level, we need strong state level action now. As a resident of a RGGI state, I call on you to lead the way.

Sincerely,

Victor Langelo
