Subject: Modeling Assumptions

I recently had the opportunity to review materials used in the July 12th 2012 webinar for the RGGI program review. I wanted to bring to your attention errors in your retirement assumptions. The list for New York includes our Astoria Units 2&4 as well as our Gowanus Barges 1&4. At this time no units have been retired. Astoria Units 2&4 have been put in mothball status pending market recovery and Gowanus Barges 1&4 remain fully operational units being bid into both the energy and capacity markets.

In addition the name plate capacities listed do not match the actual nameplates of those units and vary substantially.

Please call me if you have any questions at 212 792-0897

John Reese
