

Dear Governor and RGGI Board Members,

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Fairlee Gamble
80 Lyme Rd Apt 341
Hanover, NH 03755-1234

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Abril Novoa Camino

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Pat Berger
PO Box 667
Oakland, ME 04963-0667

Dear Governor and RGGI Board Members,

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Colleen Farmer

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Nancy Carringer

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Jim Snee

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Roy Sivley

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Patricia Tesoriero

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

R Nelson

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Thomas Reynolds

Dear Governor and RGGI Board Members,

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Cynthia Schlegel

Dear Governor and RGGI Board Members,

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Irving Lee
20 Confucius Plz Apt 43A
New York, NY 10002-6761

Dear Governor and RGGI Board Members,

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Tanya Russell

Dear Governor and RGGI Board Members,

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Claire Leavitt
400 Triphammer Rd
Ithaca, NY 14850-2539

Dear Governor and RGGI Board Members,

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Karl Novak

Dear Governor and RGGI Board Members,

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Michael Nelson
122 West St Apt 2M
Brooklyn, NY 11222-1972

Dear Governor and RGGI Board Members,

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Steven Belfield
100 Oliver St Apt 619
North Tonawanda, NY 14120-5435

Dear Governor and RGGI Board Members,

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Patrick Lathrop

Dear Governor and RGGI Board Members,

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Susan Gilroy

Dear Governor and RGGI Board Members,

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Anne Weems
67 Richardson St
Brooklyn, NY 11211-1320

Dear Governor and RGGI Board Members,

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Zeke A
12 Main St
Johnson City, NY 13790-2433

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Therese Larochelle
78 Purinton Ave
Augusta, ME 04330-4333

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Amy Henry

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Allison Chartrand

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Cassandra Brewer

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Susan Rose
1401 Elm Ave Apt D2
Brooklyn, NY 11230-5966

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Jennifer Hansen

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Mike Gilligan

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Nancy Benjamin

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

J Diamond

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Bryan Zarpentine

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Nancy D'Angelo

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Karen Karste

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Diana Bain

Dear Governor and RGGI Board Members,

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Claudette Preisinger
8605 N Monroe Ave
Lindenhurst, NY 11757-2900

Dear Governor and RGGI Board Members,

Dear Governor and RGGI Board Members,

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Lawrence Brown

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Dana Loew

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Mona White

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Richard Jervey

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Blake Stoll

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Jaclyn Pillitteri

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Peter Townsend

Dear Governor and RGGI Board Members,

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Natalia Kant

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

MaryAnn Gianantoni

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Robert Nixon

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Daniel Capson

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Juliet Menditto
1708 Gates Ave Apt 2R
Ridgewood, NY 11385-9302

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Karen Fredrickson

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Michael Roman

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Jamshid Lotfi

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Judith Angelson

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Jill Nicholas

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Wayne Shattes

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Michael Konstan

Dear Governor and RGGI Board Members,

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Andrew Luckhardt
99 Hardy Rd
Londonderry, NH 03053-2825

Dear Governor and RGGI Board Members,

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Regina Hlavac

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

John Naughton

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Manon Roberge

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Susan Tannenbaum

Dear Governor and RGGI Board Members,

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Jaimie Frost

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Robert Bates

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Carole Mcauliffe

Dear Governor and RGGI Board Members,

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Glenda Stowell

Dear Governor and RGGI Board Members,

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Val Woolley
202 N Truro St
Hull, MA 02045-3058

Dear Governor and RGGI Board Members,

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Janice Banks
14 Maple St
Center Barnstead, NH 03225-3602

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Janice Kozlowski

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Leonard Baczek

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Brendan Havner

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Graeme Stasyshyn

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Robert Merikangas

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Marie Alabiso

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Erica Mulcahy

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Philip Gatov

Dear Governor and RGGI Board Members,

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Susan Montague
266 N Plain Rd
Housatonic, MA 01236-9720

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Carole Kruse

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Chris Depaolo

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Charlotte Harrington

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

James Bell

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Brenda Woodward

Dear Governor and RGGI Board Members,

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Marlene Hodgdon
1092 Osgood Hill Rd
Westford, VT 05494-9748

Dear Governor and RGGI Board Members,

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Alice Arnold

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Avram Arian

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Peter Kahigian

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Elisabeth Spaeth

Dear Governor and RGGI Board Members,

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Denis Hawkins

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Robert Petersen

As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

E Awsukiewicz

As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Eileen Kocum
374 Eastbury Hill Rd
Glastonbury, CT 06033-3914

Dear Governor and RGGI Board Members,

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Brian Hauprich
PO Box 321
Islesboro, ME 04848-0321

Dear Governor and RGGI Board Members,

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Ilona Larson

As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Kathy Burch

As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Marcia Wilkins
56 Flax Hill Rd
Brookfield, CT 06804-1717

Dear Governor and RGGI Board Members,

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Lora Tenenbaum

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Julie Ruben

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Bernice Baeumler
