

Dear Governor and RGGI Board Members,

"We do not inherit the Earth from our Ancestors, we borrow it from our Children" Let's do the right thing now ... before it is too late!

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Lois Hetherley  
PO Box 291  
Bloomfield, NY 14469-0291

Dear Governor and RGGI Board Members,

1) Approach and enlist cooperation of the packaging industry.

2) Launch a drive to pass legislation to ban plastic bags, how about in parts of Mass..

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Diane Doucette  
20 Church St Apt 6  
Braintree, MA 02184-3248

Dear Governor and RGGI Board Members,

A clean breath, water, healthy crops, air is a HUMAN RIGHT.

LET US STAY IN TRACK TO COMBAT CLIMATE DISRUPTION!

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. Nashua, NH 03064-1808

Dear Governor and RGGI Board Members,

As a person who loves nature and its creatures, I hope you will support RGGI and that we can all work together!

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Roxane Blake  
22 Coolidge Ct  
Windsor, VT05089-1427

Dear Governor and RGGI Board Members,

As a resident of Massachusetts, I feel it is our duty to stand at the forefront of the climate revolution. This is an education hub, an area rich in research based on ingenuity and innovation. Therefore, we should be leading the rest of the country in tac

As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Karen Mallozzi  
168 Speen St  
Natick, MA 01760-2557

Dear Governor and RGGI Board Members,

Climate change is a real threat. Please take decisive action now, so we can all look back 10 years from now and say you did the right thing. You know the reality. If you lead, other people will appreciate your decision, if not now then soon.

A tax on carb

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. Dear Policy Makers,

We know, as you do, that climate change is real, it is affected by our policy decisions, and doing everything we can to reduce its impact is the best thing for Americans (not to mention the rest of the world). Please, please, do ever

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Jessica Kuh  
161 Raymond St Apt 3  
Cambridge, MA 02140-3314

Dear Governor and RGGI Board Members,

Deregulation is not appropriate for issues that allow certain industries to do things that effect the health and economy of the whole country. Remember that "Trickle Down Economics" during the Reagan years did not work. Deregulation subsidizes certain i

Wayland, MA 01778-2402

Dear Governor and RGGI Board Members,

Govenor Cuomo,

Please hear our voices. We need your strong leadership. Clean energy initiatives will create jobs! No more energy derived from coal! RGGI will help me to afford clean energy. Moving forward together!

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. Peter Rennee  
575 Main St Apt 302  
New York, 10044-0332

Dear Governor and RGGI Board Members,

I am a teacher in Springfield MA. Almost 75% of my students have asthma. Let's keep coal and dirty oil out of our state.

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Susan Post  
3 Leemond St  
Wilbraham, MA 01095-1541

Dear Governor and RGGI Board Members,

I am a voter & am paying close attention to decisions leaders make!

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). I installed solar on my house 2 years ago. Incentive programs need to be enhanced.

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Dennis Kloepping  
48 South St  
Upton, MA01568-1407

Dear Governor and RGGI Board Members,

I just converted our house to all electric last year, and I just traded in my gasoline car and purchased a new Chevy BOLT. I am now counting on government to do their part to make all of our electric power plant generation clean.

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Robert Ekman  
11401 S Glen Rd  
Potomac, MD 20854-1851

Dear Governor and RGGI Board Members,

I just received an email from Speaker Carl Heastie regarding funding for the Environmental Protection Fund and I want to both congratulate and thank New York State for supporting the environment.

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Mary Hourihan  
14 Dolbeer St  
Perry, NY 14530-1531

Dear Governor and RGGI Board Members,

I just want clean air and water and to reduce climate change.

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Sincerely,

John Doucette  
98 Radcliffe Ave  
Providence, RI 02908-2945

Dear Governor and RGGI Board Members,

It's a fair beginning but RGGI needs a lot of beefing up to make the necessary pollution reductions. As the Federal government has its head in the sand, the States must be aggressive.

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Nancy Brothers  
PO Box 391  
Callicoon Ctr, NY 12724-0391

Dear Governor and RGGI Board Members,

It's comforting to know that New York State is a leader in clean energy. Keep up the good work!

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. Let's keep this cause front and center! It's a legacy to our children and grandchildren!!

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Judie Grossman  
223 Egremont Plain Rd # 585  
Egremont, MA 01230-2284

Dear Governor and RGGI Board Members,

Let's lead the way in creating a future for everyone with clean energy. It will be Maryland's legacy, a state to be proud of as a leader in environmental issues.

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. Jeffersonville, NY 12748-0567

Dear Governor and RGGI Board Members,

MY GOD is CLEAN AIR WATER AND FOOD WE the PEOPLE have the right to a clean and healthy environment. Stop the Corporate take over stop giving all rights to Big Business they have a duty to respect the PLANET.

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

P Gorbert  
55 Greenlawn Ter  
Copiague, NY 11726-4409

Dear Governor and RGGI Board Members,

My personal use of rooftop solar electric generation, high efficiency natural gas home heating unit, high efficiency wood-burning unit, and of a 50 mpg hybrid vehicle, have saved me significant money and supported local employment. Much of this change wa

Dear Governor and RGGI Board Members,

Our world can not tolerate these disastrous decisions.

Please make every effort to make TRUMP's administration turn this around & get on track! They really could not be this brainless!?! It affects their well being TOO!!!

They need to really LOOK at what t

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

K Beck  
15 Mimosa Dr  
Newark, DE19711-7510

Dear Governor and RGGI Board Members,

Over time, It will cost less money to use more solar electricity and less fossil fuel energy.

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Dear Governor and RGGI Board Members,

P.S. Thanks to Governor Cuomo et. al. for keeping fracking out of our state. Keep protecting our ground water supplies. One of these days, people will be moving back to New York because we will be one of the few states with clean and sufficient water.

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. Please do not be a player in letting NH go backwards. Our children and our children's children are depending on us.

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Linda Morrow  
21 Camel Hump Rd  
Newport, NH 03773-1476

Dear Governor and RGGI Board Members,

Please do not commit any NY State funds to Nuclear Energy. Better spent upgrading grid so energy that is produced by renewables can be distributed through out NYS.

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. Greenfield Center, NY12833-0324

Dear Governor and RGGI Board Members,

Please let's make sure that Maryland does its part to reducing greenhouse gases. We must make sure that the planet our children and grandchildren inherit is fit to live on! Thank you!

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Cinder Hypki  
2103 Bank St  
Baltimore, 21231-2717

Dear Governor and RGGI Board Members,

Please make clean energy, including no fracking, a priority for the environment and for good jobs.

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. Cornish, NH 03745-4622

Dear Governor and RGGI Board Members,

Please think of the water your grandchildren will be drinking and how we can meet our goals with alternative sources.

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Michael Callan  
36 Young Rd  
Katonah, NY10536-3217

Dear Governor and RGGI Board Members,

Please use your leadership stature to persuade all local organizations such as the Woods Hole Research Center, the Marine Biological Laboratory, the Woods Hole Resources Center and Woods Hole Geographic Institution to join this call to action! Thank you

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

RGGI works. Keep it going in NH

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

J Staples  
60 Skyline Dr  
Keene, NH 03431-5258

Dear Governor and RGGI Board Members,

RGGI's members should be looking at developing renewable natural gas, derived from organic waste, as an energy source both for the electrical grid and for transportation.

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Phil Vos  
488 7th St  
Brooklyn, NY 11215-3613

Dear Governor and RGGI Board Members,

Saves big money, helps businesses & creates many jobs, curbs pollution, and reduces our contributions to climate change. Simple. Just do what is right.

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. Dear Governor and RGGI Board Members,

Thank you for standing strong to ensure our population has clean air, water & useable land & free space now & for future generations. With the great lakes on our borders, NYState has an even greater responsibility to protect the largest world supply of fr

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Sonia Kragh

Thanks to governor Hogan for the fracking ban.

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Barbara Risacher  
17 Neptune Dr  
Joppa, MD21085-4519

Dear Governor and RGGI Board Members,

Thanks to you who have "stayed the course." Please accept my invitation to join with those of us who desire a cleaner, more healthy atmosphere and land for our descendants and yours..

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Melvyn Schnall  
16 Charlotte Rd  
Newton Center, MA 02459-1708

Dear Governor and RGGI Board Members,

There is no life without clean air and water.

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Rob Stein  
12 Tebelt Ln  
West Hurley, NY 12491-5158

Dear Governor and RGGI Board Members,

Though you're a republican I hope you stand up for clean air and water. Protecting the environment is important for all.

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Marlene Chamberlain  
PO Box 492  
Goshen, NH03752-0492

Dear Governor and RGGI Board Members,

Time to act responsibly for Mainers and the nation.

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Philip Dooley  
192 Goose Ln  
Tolland, CT 06084-3821

Dear Governor and RGGI Board Members,

We need more progressives like Gov. Andrew Cuomo, Sen. Bernie Sanders and Sen. Kirsten Gillibrand in office

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Douglas Coffin  
404 W Bloomfield St Apt 4  
Rome, NY13440-4157

Dear Governor and RGGI Board Members,

We need more solar and wind and less dependence on dirty energy. That includes nuclear with all its dangers and waste problems.

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Dear Governor and RGGI Board Members,

We so often serve as an example for other parts of the country. Let this be our way of showing how environmentally good policies can thrive on a regional level and make those regions thrive in return.

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Sally Kiebdaj  
PO Box 381387  
Cambridge, MA 02238-1387

Dear Governor and RGGI Board Members,

We support state and regional initiatives to meet higher climate goals. Keep NY state in the leadership role. With the president heading backwards on environmental issues, it is essential that the states and regional level pick up the torch and run wi

Dear Governor and RGGI Board Members,

You know we need to do everything we can to, at the very least, slow down climate change with a goal to reversing it. It is morally and economically wise to reduce carbon emissions. Be our leaders into a future we can embrace. Thank you.

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

Analysis shows we need to be reducing carbon pollution from power plants by at least 5% annually from 2020 levels through 2030 to remain on track to meet our climate commitments. At the same time, locking in that clean energy progress through RGGI will save households and businesses billions of dollars and create tens of thousands of new jobs. We need you to study and finalize a strong and just clean energy future for RGGI and our communities, families, and businesses.

Sincerely,

Kathleen Brown McNally

New York, NY 10023-7853

Dear Governor and RGGI Board Members,

You need look no further than the People's Climate March this coming weekend to gauge the level of widespread support for smart and meaningful climate action. The RGGI is one such effort that moves us in the right direction.

We need your leadership now more than ever to keep the state and region on track to reduce carbon pollution contributing to climate disruption, create jobs, and help families and businesses save money through the Regional Greenhouse Gas Initiative (RGGI). As participating states consider the future of the popular and successful RGGI program, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.
