

Dear Commissioners,

...and a job well done!

Thank you for joining together to protect the climate, reduce pollution from power plants, create jobs, and grow the regional economy by proposing a stronger future for the popular and successful Regional Greenhouse Gas Initiative (RGGI). A stronger RGGI program saves people's lives and families and businesses money. It means a cleaner environment and more prosperous communities.

As you commit to reduce pollution limits from big power plants by 30% from 2020 to 2030, please make sure the benefits support those who have been most overburdened by that pollution and underserved by regional economic opportunities. Please close the loophole that allows large plants composed of many small units to avoid paying for their pollution and invest more in communities on the frontlines of pollution, climate disruption, and poverty.

In addition, I encourage you to apply the lessons learned from the RGGI program to help limit, price, and reduce climate pollution from transportation and heating fuels as well. Without a path to drive pollution reductions from these sectors, we will not be able to achieve our climate goals. Thank you.

Sincerely,

Eric Speed  
PO Box 117  
Strafford, NH 3884

Dear Commissioners,

a big THANK YOU!

Thank you for joining together to protect the climate, reduce pollution from power plants, create jobs, and grow the regional economy by proposing a stronger future for the popular and successful Regional Greenhouse Gas Initiative (RGGI). A stronger RGGI program saves people's lives and families and businesses money. It means a cleaner environment and more prosperous communities.

Please close the loophole that allows large plants composed of many small units to avoid paying for their pollution and invest more in communities on the frontlines of pollution, climate disruption, and poverty.

In addition, I encourage you to apply the lessons learned from the RGGI program to help limit, price, and reduce climate pollution from transportation and heating fuels as well. Without a path to drive pollution reductions from these sectors, we will not be able to achieve our climate goals. Thank you.

Sincerely,

Matthew Genaze  
334 Harvard St  
Cambridge, MA 2139

Dear Commissioners,

Global climate disruption is literally the most important issue in the world, because if we don't deal with it, almost every other problem in the world will get even worse than it would otherwise: health care needs, public health issues, war, needs of refugees, immigration, housing, security, infrastructure, and--both directly and via all the above--the economy, especially global poverty.

Thank you for joining together to protect the climate, reduce pollution from power plants, create jobs, and grow the regional economy by proposing a stronger future for the popular and successful Regional Greenhouse Gas Initiative (RGGI). A stronger RGGI program saves people's lives and families and businesses money. It means a cleaner environment and more prosperous communities.

As you commit to reduce pollution limits from big power plants by 30% from 2020 to 2030, please make sure the benefits support those who have been most overburdened by that pollution and underserved by regional economic opportunities. Please close the loophole that allows large plants composed of many small units to avoid paying for their pollution and invest more in communities on the frontlines of pollution, climate disruption, and poverty.

In addition, I encourage you to apply the lessons learned from the RGGI program to help limit, price, and reduce climate pollution from transportation and heating fuels as well. Without a path to drive pollution reductions from these sectors, we will not be able to achieve our climate goals. Thank you.

Sincerely,

Amy Fass

Greenbelt, MD 20770

Dear Commissioners,

Governor Hogan, I have only voted for an "R" in local and state government elections a very small handful of times in my life (2 maybe 3), and each time with great regret as they then voted rank and file. I am so impressed with how you have handled governing this great state I am for the first time in many years considering placing my future vote with you, you are proving to me that bi-partisanship can work.

Thank you for joining together to protect the climate, reduce pollution from power plants, create jobs, and grow the regional economy by proposing a stronger future for the popular and successful Regional Greenhouse Gas Initiative (RGGI). A stronger RGGI program saves people's lives and families and businesses money. It means a cleaner environment and more prosperous communities.

Weare, NH 3281

Dear Commissioners,

How wonderful it would be if the energy and commitment demonstrated in the Northeast could be put into service of spurring the same in other parts of the US. Perhaps that's the very best use of a national reputation.

Thank you for joining together to protect the climate, reduce pollution from power plants, create jobs, and grow the regional economy by proposing a stronger future for the popular and successful Regional Greenhouse Gas Initiative (RGGI). A stronger RGGI program saves people's lives and families and businesses money. It means a cleaner environment and more prosperous communities.

Mendon, MA 1756

Dear Commissioners,

I am certainly not a Scientist but a lay person who can see the destruction from using the different types of fossil fuel. We need to do all we can to get to a time when our air is clean, our water is safe and we are growing our economy by the use of sustainable energy sources and also not destroying our wonderful National Parks and other public lands to pad the pockets of the already filftly rich. Thank you for believing and taking such steps needed.

Thank you for joining together to protect the climate, reduce pollution from power plants, create jobs, and grow the regional economy by proposing a stronger future for the popular and successful Regional Greenhouse Gas Initiative (RGGI). A stronger RGGI program saves people's lives and families and businesses money. It means a cleaner environment and more prosperous communities.

A stronger RGGI program saves people's lives and families and businesses money. It means a cleaner environment and more prosperous communities.

As you commit to reduce pollution limits from big power plants by 30% from 2020 to 2030, please make sure the benefits support those who have been most overburdened by that pollution and underserved by regional economic opportunities. Please close the loophole that allows large plants composed of many small units to avoid paying for their pollution and invest more in communities on the frontlines of pollution, climate disruption, and poverty.

In addition, I encourage you to apply the lessons learned from the RGGI program to help limit, price, and reduce climate pollution from transportation and heating fuels as well. Without a path to drive pollution reductions from these sectors, we will not be able to achieve our climate goals. Thank you.

Sincerely,

Janet Matthews

274 N Centre Ave Apt 43B

Rockville Centre, NY 11570

Dear Commissioners,

If it supports clean energy, creates jobs and makes our world a healthier place I'm all for it.

THANKS.

Thank you for joining together to protect the climate, reduce pollution from power plants, create jobs, and grow the regional economy by proposing a stronger future for the popular and successful Regional Greenhouse Gas Initiative (RGGI). A stronger RGGI program saves people's lives and families and businesses money. It means a cleaner environment and more prosperous communities.

As you commit to reduce pollution limits from big power plants by 30% from 2020 to 2030, please make sure the benefits support those who have been most overburdened by that pollution and underserved by regional economic opportunities. Please close the loophole that allows large plants composed of many small units to avoid paying for their pollution and invest more in communities on the frontlines of pollution, climate disruption, and poverty.

In addition, I encourage you to apply the lessons learned from the RGGI program to help limit, price, and reduce climate pollution from transportation and heating fuels as well. 300 Houtman Rd Apt B  
Saugerties, NY 12477

Dear Commissioners,

It is good to see that you were able to protect our environment even with all the budget mess. I don't think our Gov will read this but whoever is could suggest to the Gov to invite the leading lawmakers of both parties into a conference with him and lock themselves into the room until the budget is settled, like in the days of Pres Teddy Roosevelt.

Thank you for joining together to protect the climate, reduce pollution from power plants, create jobs, and grow the regional economy by proposing a stronger future for the popular and successful Regional Greenhouse Gas Initiative (RGGI). A stronger RGGI program saves people's lives and families and businesses money. It means a cleaner environment and more prosperous communities.

As you commit to reduce pollution limits from big power plants by 30% from 2020 to 2030, please make sure the benefits support those who have been most overburdened by that pollution and underserved by regional economic opportunities. Please close the loophole that allows large plants composed of many small units to avoid paying for their pollution and invest more in communities on the frontlines of pollution, climate disruption, and poverty.

In addition, I encourage you to apply the lessons learned from the RGGI program to help limit, price, and reduce climate pollution from transportation and heating fuels as well. Without a path to drive pollution reductions from these sectors, we will not be able to achieve our climate goals. Thank you.

Sincerely,

Ryan Lugo  
28940 Kemptown Rd  
Damascus, MD 20872

Dear Commissioners,

Mother Earth is our only home. We must protect it for the benefit of all life forms.

Thank you for joining together to protect the climate, reduce pollution from power plants, create jobs, and grow the regional economy by proposing a stronger future for the popular and successful Regional Greenhouse Gas Initiative (RGGI). A stronger RGGI program saves people's lives and families and businesses money. It means a cleaner environment and more prosperous communities.

As you commit to reduce pollution limits from big power plants by 30% from 2020 to 2030, please make sure the benefits support those who have been most overburdened by that pollution and underserved by regional economic opportunities. Please close the loophole that allows large plants composed of many small units to avoid paying for their pollution and invest more in communities on the frontlines of pollution, climate disruption, and poverty.

Dear Commissioners,

RGGI NEEDS TO BE AUGMENTED AND EXPANDED. THIS PROGRAM CAN DO A LOT OF GOOD, BUT IT IS ONLY A FIRST STEP TOWARDS THE CLEAN ENERGY FUTURE WE MUST HAVE.

Thank you for joining together to protect the climate, reduce pollution from power plants, create jobs, and grow the regional economy by proposing a stronger future for the popular and successful Regional Greenhouse Gas Initiative (RGGI). A stronger RGGI program saves people's lives and families and businesses money. It means a cleaner environment and more prosperous communities.

As you commit to reduce pollution limits from big power plants by 30% from 2020 to 2030, please make sure the benefits support those who have been most overburdened by that pollution and underserved by regional economic opportunities. Please close the loophole that allows large plants composed of many small units to avoid paying for their pollution and invest more in communities on the frontlines of pollution, climate disruption, and poverty.

In addition, I encourage you to apply the lessons learned from the RGGI program to help limit, price, and reduce climate pollution from transportation and heating fuels as well. Without a path to drive pollution reductions from these sectors, we will not be able to achieve our climate goals. Thank you.

Sincerely,

Carolyn Ricketts  
207 Riverside Rd  
Edgewater, MD 21037

Dear Commissioners,

Right on! Carl

Thank you for joining together to protect the climate, reduce pollution from power plants, create jobs, and grow the regional economy by proposing a stronger future for the popular and successful Regional Greenhouse Gas Initiative (RGGI). A stronger RGGI program saves people's lives and families and businesses money. It means a cleaner environment and more prosperous communities.

As you commit to reduce pollution limits from big power plants by 30% from 2020 to 2030, please make sure the benefits support those who have been most overburdened by that pollution and underserved by regional economic opportunities. Please close the loophole that allows large plants composed of many small units to avoid paying for their pollution and invest more in communities on the frontlines of pollution, climate disruption, and poverty.

In addition, I encourage you to apply the lessons learned from the RGGI program to help limit, price, and reduce climate pollution from transportation and heating fuels as well. Without a path to drive pollution reductions from these sectors, we will not be able to achieve our climate goals. Thank you.

Sincerely,

Carl Grimm

A stronger RGGI program saves people's lives and families and businesses money. It means a cleaner environment and more prosperous communities.

As you commit to reduce pollution limits from big power plants by 30% from 2020 to 2030, please make sure the benefits support those who have been most overburdened by that pollution and underserved by regional economic opportunities. Please close the loophole that allows large plants composed of many small units to avoid paying for their pollution and invest more in communities on the frontlines of pollution, climate disruption, and poverty.

In addition, I encourage you to apply the lessons learned from the RGGI program to help limit, price, and reduce climate pollution from transportation and heating fuels as well. Without a path to drive pollution reductions from these sectors, we will not be able to achieve our climate goals. Thank you.

Sincerely,

Maude Rith  
540 Main St  
Etna, NY 13062

Dear Commissioners,

Thank you state officials.

Thank you for joining together to protect the climate, reduce pollution from power plants, create jobs, and grow the regional economy by proposing a stronger future for the popular and successful Regional Greenhouse Gas Initiative (RGGI). A stronger RGGI program saves people's lives and families and businesses money. It means a cleaner environment and more prosperous communities.

As you commit to reduce pollution limits from big power plants by 30% from 2020 to 2030, please make sure the benefits support those who have been most overburdened by that pollution and underserved by regional economic opportunities. Please close the loophole that allows large plants composed of many small units to avoid paying for their pollution and invest more in communities on the frontlines of pollution, climate disruption, and poverty.

In addition, I encourage you to apply the lessons learned from the RGGI program to help limit, price, and reduce climate pollution from transportation and heating fuels as well. we have to plan for a sustainable future

Thank you for joining together to protect the climate, reduce pollution from power plants, create jobs, and grow the regional economy by proposing a stronger future for the popular and successful Regional Greenhouse Gas Initiative (RGGI). A stronger RGGI program saves people's lives and families and businesses money. It means a cleaner environment and more prosperous communities.

As you commit to reduce pollution limits from big power plants by 30% from 2020 to 2030, please make sure the benefits support those who have been most overburdened by that pollution and underserved by regional economic opportunities. Please close the loophole that allows large plants composed of many small units to avoid paying for their pollution and invest more in communities on the frontlines of pollution, climate disruption, and poverty.

In addition, I encourage you to apply the lessons learned from the RGGI program to help limit, price, and reduce climate pollution from transportation and heating fuels as well. Without a path to drive pollution reductions from these sectors, we will not be able to achieve our climate goals. Thank you.

Sincerely,

John & Edith Root  
1316 County Route 13  
Old Chatham, NY 12136

Dear Commissioners,

**WE HAVE TO TRY HARDER TO GO GREEN!!**

Thank you for joining together to protect the climate, reduce pollution from power plants, create jobs, and grow the regional economy by proposing a stronger future for the popular and successful Regional Greenhouse Gas Initiative (RGGI). A stronger RGGI program saves people's lives and families and businesses money. It means a cleaner environment and more prosperous communities.

A stronger RGGI program saves people's lives and families and businesses money. It means a cleaner environment and more prosperous communities.

As you commit to reduce pollution limits from big power plants by 30% from 2020 to 2030, please make sure the benefits support those who have been most overburdened by that pollution and underserved by regional economic opportunities. Please close the loophole that allows large plants composed of many small units to avoid paying for their pollution and invest more in communities on the frontlines of pollution, climate disruption, and poverty.

In addition, I encourage you to apply the lessons learned from the RGGI program to help limit, price, and reduce climate pollution from transportation and heating fuels as well. Without a path to drive pollution reductions from these sectors, we will not be able to achieve our climate goals. Thank you.

Sincerely,

Merrill Frank

Sandwich, NH 3227

Dear Commissioners,

Thank you for joining together to protect the climate, reduce pollution from power plants, create jobs, and grow the regional economy by proposing a stronger future for the popular and successful Regional Greenhouse Gas Initiative (RGGI). A stronger RGGI program saves people's lives and families and businesses money. It means a cleaner environment and more prosperous communities.

As you commit to reduce pollution limits from big power plants by 30% from 2020 to 2030, please make sure the benefits support those who have been most overburdened by that pollution and underserved by regional economic opportunities. Please close the loophole that allows large plants composed of many small units to avoid paying for their pollution and invest more in communities on the frontlines of pollution, climate disruption, and poverty.

In addition, I encourage you to apply the lessons learned from the RGGI program to help limit, price, and reduce climate pollution from transportation and heating fuels as well. Without a path to drive pollution reductions from these sectors, we will not be able to achieve our climate goals. Thank you.

Sincerely,

Ben Spiegel

Thank you for joining together to protect the climate, reduce pollution from power plants, create jobs, and grow the regional economy by proposing a stronger future for the popular and successful Regional Greenhouse Gas Initiative (RGGI). A stronger RGGI program saves people's lives and families and businesses money. It means a cleaner environment and more prosperous communities.

As you commit to reduce pollution limits from big power plants by 30% from 2020 to 2030, please make sure the benefits support those who have been most overburdened by that pollution and underserved by regional economic opportunities. Please close the loophole that allows large plants composed of many small units to avoid paying for their pollution and invest more in communities on the frontlines of pollution, climate disruption, and poverty.

In addition, I encourage you to apply the lessons learned from the RGGI program to help limit, price, and reduce climate pollution from transportation and heating fuels as well. Without a path to drive pollution reductions from these sectors, we will not be able to achieve our climate goals. Thank you.

Sincerely,

Jack Polonka

As you commit to reduce pollution limits from big power plants by 30% from 2020 to 2030, please make sure the benefits support those who have been most overburdened by that pollution and underserved by regional economic opportunities. Please close the loophole that allows large plants composed of many small units to avoid paying for their pollution and invest more in communities on the frontlines of pollution, climate disruption, and poverty.

In addition, I encourage you to apply the lessons learned from the RGGI program to help limit, price, and reduce climate pollution from transportation and heating fuels as well. Without a path to drive pollution reductions from these sectors, we will not be able to achieve our climate goals. Thank you.

Sincerely,

Leslie Bereck

Mahopac, NY 10541

Dear Commissioners,

Thank you for joining together to protect the climate, reduce pollution from power plants, create jobs, and grow the regional economy by proposing a stronger future for the popular and successful Regional Greenhouse Gas Initiative (RGGI). A stronger RGGI program saves people's lives and families and businesses money. It means a cleaner environment and more prosperous communities.

As you commit to reduce pollution limits from big power plants by 30% from 2020 to 2030, please make sure the benefits support those who have been most overburdened by that pollution and underserved by regional economic opportunities. Lloyd Harbor, NY 11743

Dear Commissioners,

Thank you for joining together to protect the climate, reduce pollution from power plants, create jobs, and grow the regional economy by proposing a stronger future for the popular and successful Regional Greenhouse Gas Initiative (RGGI). A stronger RGGI program saves people's lives and families and businesses money. It means a cleaner environment and more prosperous communities.

As you commit to reduce pollution limits from big power plants by 30% from 2020 to 2030, please make sure the benefits support those who have been most overburdened by that pollution and underserved by regional economic opportunities. Please close the loophole that allows large plants composed of many small units to avoid paying for their pollution and invest more in communities on the frontlines of pollution, climate disruption, and poverty.

In addition, I encourage you to apply the lessons learned from the RGGI program to help limit, price, and reduce climate pollution from transportation and heating fuels as well. Without a path to drive pollution reductions from these sectors, we will not be able to achieve our climate goals. Thank you.

Sincerely,

Justin Velella  
3442 Harold St  
Oceanside, NY 11572

A stronger RGGI program saves people's lives and families and businesses money. It means a cleaner environment and more prosperous communities.

As you commit to reduce pollution limits from big power plants by 30% from 2020 to 2030, please make sure the benefits support those who have been most overburdened by that pollution and underserved by regional economic opportunities. Please close the loophole that allows large plants composed of many small units to avoid paying for their pollution and invest more in communities on the frontlines of pollution, climate disruption, and poverty.

In addition, I encourage you to apply the lessons learned from the RGGI program to help limit, price, and reduce climate pollution from transportation and heating fuels as well. Without a path to drive pollution reductions from these sectors, we will not be able to achieve our climate goals. Thank you.

Sincerely,

Katherine Dander

New York, NY 10011

Dear Commissioners,

Thank you for joining together to protect the climate, reduce pollution from power plants, create jobs, and grow the regional economy by proposing a stronger future for the popular and successful Regional Greenhouse Gas Initiative (RGGI). A stronger RGGI program saves people's lives and families and businesses money. It means a cleaner environment and more prosperous communities.

As you commit to reduce pollution limits from big power plants by 30% from 2020 to 2030, please make sure the benefits support those who have been most overburdened by that pollution and underserved by regional economic opportunities. Please close the loophole that allows large plants composed of many small units to avoid paying for their pollution and invest more in communities on the frontlines of pollution, climate disruption, and poverty.

In addition, I encourage you to apply the lessons learned from the RGGI program to help limit, price, and reduce climate pollution from transportation and heating fuels as well. Without a path to drive pollution reductions from these sectors, we will not be able to achieve our climate goals. Thank you.

Sincerely,

Michelle Tozer  
19 Kennedy St  
North Dartmouth, MA 2747

As you commit to reduce pollution limits from big power plants by 30% from 2020 to 2030, please make sure the benefits support those who have been most overburdened by that pollution and underserved by regional economic opportunities. Please close the loophole that allows large plants composed of many small units to avoid paying for their pollution and invest more in communities on the frontlines of pollution, climate disruption, and poverty.

In addition, I encourage you to apply the lessons learned from the RGGI program to help limit, price, and reduce climate pollution from transportation and heating fuels as well. Without a path to drive pollution reductions from these sectors, we will not be able to achieve our climate goals. Thank you.

Sincerely,

Eddie Ward

Southold, NY 11971

Dear Commissioners,

Thank you for joining together to protect the climate, reduce pollution from power plants, create jobs, and grow the regional economy by proposing a stronger future for the popular and successful Regional Greenhouse Gas Initiative (RGGI). A stronger RGGI program saves people's lives and families and businesses money. It means a cleaner environment and more prosperous communities.

Dear Commissioners,

Thank you for joining together to protect the climate, reduce pollution from power plants, create jobs, and grow the regional economy by proposing a stronger future for the popular and successful Regional Greenhouse Gas Initiative (RGGI). A stronger RGGI program saves people's lives and families and businesses money. It means a cleaner environment and more prosperous communities.

As you commit to reduce pollution limits from big power plants by 30% from 2020 to 2030, please make sure the benefits support those who have been most overburdened by that pollution and underserved by regional economic opportunities. Please close the loophole that allows large plants composed of many small units to avoid paying for their pollution and invest more in communities on the frontlines of pollution, climate disruption, and poverty.

In addition, I encourage you to apply the lessons learned from the RGGI program to help limit, price, and reduce climate pollution from transportation and heating fuels as well. Without a path to drive pollution reductions from these sectors, we will not be able to achieve our climate goals. Thank you.

Sincerely,

Cave Man  
609 Main St  
New York, NY 10044

As you commit to reduce pollution limits from big power plants by 30% from 2020 to 2030, please make sure the benefits support those who have been most overburdened by that pollution and underserved by regional economic opportunities. Please close the loophole that allows large plants composed of many small units to avoid paying for their pollution and invest more in communities on the frontlines of pollution, climate disruption, and poverty.

In addition, I encourage you to apply the lessons learned from the RGGI program to help limit, price, and reduce climate pollution from transportation and heating fuels as well. Without a path to drive pollution reductions from these sectors, we will not be able to achieve our climate goals. Thank you.

Sincerely,

Tony Mendousa  
20 Cross Rd  
Orleans, MA 2653

Dear Commissioners,

Thank you for joining together to protect the climate, reduce pollution from power plants, create jobs, and grow the regional economy by proposing a stronger future for the popular and successful Regional Greenhouse Gas Initiative (RGGI). A stronger RGGI program saves people's lives and families and businesses money. It means a cleaner environment and more prosperous communities.

As you commit to reduce pollution limits from big power plants by 30% from 2020 to 2030, please make sure the benefits support those who have been most overburdened by that pollution and underserved by regional economic opportunities. Hamilton, NY 13346

Dear Commissioners,

Thank you for joining together to protect the climate, reduce pollution from power plants, create jobs, and grow the regional economy by proposing a stronger future for the popular and successful Regional Greenhouse Gas Initiative (RGGI). A stronger RGGI program saves people's lives and families and businesses money. It means a cleaner environment and more prosperous communities.

As you commit to reduce pollution limits from big power plants by 30% from 2020 to 2030, please make sure the benefits support those who have been most overburdened by that pollution and underserved by regional economic opportunities. Please close the loophole that allows large plants composed of many small units to avoid paying for their pollution and invest more in communities on the frontlines of pollution, climate disruption, and poverty.

In addition, I encourage you to apply the lessons learned from the RGGI program to help limit, price, and reduce climate pollution from transportation and heating fuels as well. Without a path to drive pollution reductions from these sectors, we will not be able to achieve our climate goals. Thank you.

Sincerely,

Maren Solomon-Wang  
68 Fernview Ave Apt 3  
North Andover, MA 1845

As you commit to reduce pollution limits from big power plants by 30% from 2020 to 2030, please make sure the benefits support those who have been most overburdened by that pollution and underserved by regional economic opportunities. Please close the loophole that allows large plants composed of many small units to avoid paying for their pollution and invest more in communities on the frontlines of pollution, climate disruption, and poverty.

In addition, I encourage you to apply the lessons learned from the RGGI program to help limit, price, and reduce climate pollution from transportation and heating fuels as well. Without a path to drive pollution reductions from these sectors, we will not be able to achieve our climate goals. Thank you.

Sincerely,

Resa Blatman

Somerville, MA 2145

Dear Commissioners,

Thank you for joining together to protect the climate, reduce pollution from power plants, create jobs, and grow the regional economy by proposing a stronger future for the popular and successful Regional Greenhouse Gas Initiative (RGGI). A stronger RGGI program saves people's lives and families and businesses money. It means a cleaner environment and more prosperous communities.

As you commit to reduce pollution limits from big power plants by 30% from 2020 to 2030, please make sure the benefits support those who have been most overburdened by that pollution and underserved by regional economic opportunities. Please close the loophole that allows large plants composed of many small units to avoid paying for their pollution and invest more in communities on the frontlines of pollution, climate disruption, and poverty.

Please close the loophole that allows large plants composed of many small units to avoid paying for their pollution and invest more in communities on the frontlines of pollution, climate disruption, and poverty.

In addition, I encourage you to apply the lessons learned from the RGGI program to help limit, price, and reduce climate pollution from transportation and heating fuels as well. Without a path to drive pollution reductions from these sectors, we will not be able to achieve our climate goals. Thank you.

Sincerely,

Lisa Torrence

Dear Commissioners,

Thank you for joining together to protect the climate, reduce pollution from power plants, create jobs, and grow the regional economy by proposing a stronger future for the popular and successful Regional Greenhouse Gas Initiative (RGGI). A stronger RGGI program saves people's lives and families and businesses money. It means a cleaner environment and more prosperous communities.

As you commit to reduce pollution limits from big power plants by 30% from 2020 to 2030, please make sure the benefits support those who have been most overburdened by that pollution and underserved by regional economic opportunities. Please close the loophole that allows large plants composed of many small units to avoid paying for their pollution and invest more in communities on the frontlines of pollution, climate disruption, and poverty.

In addition, I encourage you to apply the lessons learned from the RGGI program to help limit, price, and reduce climate pollution from transportation and heating fuels as well. Without a path to drive pollution reductions from these sectors, we will not be able to achieve our climate goals. Thank you.

Rockville, MD 20853

Dear Commissioners,

Thank you for joining together to protect the climate, reduce pollution from power plants, create jobs, and grow the regional economy by proposing a stronger future for the popular and successful Regional Greenhouse Gas Initiative (RGGI). A stronger RGGI program saves people's lives and families and businesses money. It means a cleaner environment and more prosperous communities.

As you commit to reduce pollution limits from big power plants by 30% from 2020 to 2030, please make sure the benefits support those who have been most overburdened by that pollution and underserved by regional economic opportunities. Please close the loophole that allows large plants composed of many small units to avoid paying for their pollution and invest more in communities on the frontlines of pollution, climate disruption, and poverty.

In addition, I encourage you to apply the lessons learned from the RGGI program to help limit, price, and reduce climate pollution from transportation and heating fuels as well. Without a path to drive pollution reductions from these sectors, we will not be able to achieve our climate goals. Thank you.

Sincerely,

Carlos Luna  
77 Fulton St  
New York, NY 10038

As you commit to reduce pollution limits from big power plants by 30% from 2020 to 2030, please make sure the benefits support those who have been most overburdened by that pollution and underserved by regional economic opportunities. Please close the loophole that allows large plants composed of many small units to avoid paying for their pollution and invest more in communities on the frontlines of pollution, climate disruption, and poverty.

In addition, I encourage you to apply the lessons learned from the RGGI program to help limit, price, and reduce climate pollution from transportation and heating fuels as well. Without a path to drive pollution reductions from these sectors, we will not be able to achieve our climate goals. Thank you.

Sincerely,

Otto Judicke

Carlisle, MA 1741

Dear Commissioners,

Thank you for joining together to protect the climate, reduce pollution from power plants, create jobs, and grow the regional economy by proposing a stronger future for the popular and successful Regional Greenhouse Gas Initiative (RGGI). A stronger RGGI program saves people's lives and families and businesses money. It means a cleaner environment and more prosperous communities.

As you commit to reduce pollution limits from big power plants by 30% from 2020 to 2030, please make sure the benefits support those who have been most overburdened by that pollution and underserved by regional economic opportunities. Rochester, NY 14616

Dear Commissioners,

Thank you for joining together to protect the climate, reduce pollution from power plants, create jobs, and grow the regional economy by proposing a stronger future for the popular and successful Regional Greenhouse Gas Initiative (RGGI). A stronger RGGI program saves people's lives and families and businesses money. It means a cleaner environment and more prosperous communities.

As you commit to reduce pollution limits from big power plants by 30% from 2020 to 2030, please make sure the benefits support those who have been most overburdened by that pollution and underserved by regional economic opportunities. Please close the loophole that allows large plants composed of many small units to avoid paying for their pollution and invest more in communities on the frontlines of pollution, climate disruption, and poverty.

In addition, I encourage you to apply the lessons learned from the RGGI program to help limit, price, and reduce climate pollution from transportation and heating fuels as well. Without a path to drive pollution reductions from these sectors, we will not be able to achieve our climate goals. Thank you.

Sincerely,

Steven Andrychowski  
105 Clinic Dr  
New Britain, CT 6051

Please close the loophole that allows large plants composed of many small units to avoid paying for their pollution and invest more in communities on the frontlines of pollution, climate disruption, and poverty.

In addition, I encourage you to apply the lessons learned from the RGGI program to help limit, price, and reduce climate pollution from transportation and heating fuels as well. Without a path to drive pollution reductions from these sectors, we will not be able to achieve our climate goals. Thank you.

Sincerely,

Paul Spencer

Northampton, MA 1060

Dear Commissioners,

Thank you for joining together to protect the climate, reduce pollution from power plants, create jobs, and grow the regional economy by proposing a stronger future for the popular and successful Regional Greenhouse Gas Initiative (RGGI). A stronger RGGI program saves people's lives and families and businesses money. It means a cleaner environment and more prosperous communities.

As you commit to reduce pollution limits from big power plants by 30% from 2020 to 2030, please make sure the benefits support those who have been most overburdened by that pollution and underserved by regional economic opportunities. Please close the loophole that allows large plants composed of many small units to avoid paying for their pollution and invest more in communities on the frontlines of pollution, climate disruption, and poverty.

In addition, I encourage you to apply the lessons learned from the RGGI program to help limit, price, and reduce climate pollution from transportation and heating fuels as well. Without a path to drive pollution reductions from these sectors, we will not be able to achieve our climate goals. Thank you.

Sincerely,

Robin Nadel

Dear Commissioners,

Thank you for joining together to protect the climate, reduce pollution from power plants, create jobs, and grow the regional economy by proposing a stronger future for the popular and successful Regional Greenhouse Gas Initiative (RGGI). A stronger RGGI program saves people's lives and families and businesses money. It means a cleaner environment and more prosperous communities.

As you commit to reduce pollution limits from big power plants by 30% from 2020 to 2030, please make sure the benefits support those who have been most overburdened by that pollution and underserved by regional economic opportunities. Please close the loophole that allows large plants composed of many small units to avoid paying for their pollution and invest more in communities on the frontlines of pollution, climate disruption, and poverty.

In addition, I encourage you to apply the lessons learned from the RGGI program to help limit, price, and reduce climate pollution from transportation and heating fuels as well. Without a path to drive pollution reductions from these sectors, we will not be able to achieve our climate goals. Thank you.

Sincerely,

Christopher Flynn  
64 W 128th St Apt 1C  
New York, NY 10027

As you commit to reduce pollution limits from big power plants by 30% from 2020 to 2030, please make sure the benefits support those who have been most overburdened by that pollution and underserved by regional economic opportunities. Please close the loophole that allows large plants composed of many small units to avoid paying for their pollution and invest more in communities on the frontlines of pollution, climate disruption, and poverty.

In addition, I encourage you to apply the lessons learned from the RGGI program to help limit, price, and reduce climate pollution from transportation and heating fuels as well. Without a path to drive pollution reductions from these sectors, we will not be able to achieve our climate goals. Thank you.

Sincerely,

Helen Goodspeed  
25 Rockledge Ave  
White Plains, NY 10601

Dear Commissioners,

Thank you for joining together to protect the climate, reduce pollution from power plants, create jobs, and grow the regional economy by proposing a stronger future for the popular and successful Regional Greenhouse Gas Initiative (RGGI). A stronger RGGI program saves people's lives and families and businesses money. It means a cleaner environment and more prosperous communities.

As you commit to reduce pollution limits from big power plants by 30% from 2020 to 2030, please make sure the benefits support those who have been most overburdened by that pollution and underserved by regional economic opportunities. Hubbardston, MA 1452

Dear Commissioners,

Thank you for joining together to protect the climate, reduce pollution from power plants, create jobs, and grow the regional economy by proposing a stronger future for the popular and successful Regional Greenhouse Gas Initiative (RGGI). A stronger RGGI program saves people's lives and families and businesses money. It means a cleaner environment and more prosperous communities.

As you commit to reduce pollution limits from big power plants by 30% from 2020 to 2030, please make sure the benefits support those who have been most overburdened by that pollution and underserved by regional economic opportunities. Please close the loophole that allows large plants composed of many small units to avoid paying for their pollution and invest more in communities on the frontlines of pollution, climate disruption, and poverty.

In addition, I encourage you to apply the lessons learned from the RGGI program to help limit, price, and reduce climate pollution from transportation and heating fuels as well. Without a path to drive pollution reductions from these sectors, we will not be able to achieve our climate goals. Thank you.

Sincerely,

Doreen Lebel  
120 Cherry Swamp Rd  
Moodus, CT 6469

As you commit to reduce pollution limits from big power plants by 30% from 2020 to 2030, please make sure the benefits support those who have been most overburdened by that pollution and underserved by regional economic opportunities. Please close the loophole that allows large plants composed of many small units to avoid paying for their pollution and invest more in communities on the frontlines of pollution, climate disruption, and poverty.

In addition, I encourage you to apply the lessons learned from the RGGI program to help limit, price, and reduce climate pollution from transportation and heating fuels as well. Without a path to drive pollution reductions from these sectors, we will not be able to achieve our climate goals. Thank you.

Sincerely,

Kaite Hanlon  
2615 Aspen Rd  
Port Republic, MD 20676

Dear Commissioners,

Thank you for joining together to protect the climate, reduce pollution from power plants, create jobs, and grow the regional economy by proposing a stronger future for the popular and successful Regional Greenhouse Gas Initiative (RGGI). A stronger RGGI program saves people's lives and families and businesses money. It means a cleaner environment and more prosperous communities.

Warwick, RI 2889

Dear Commissioners,

Thank you for joining together to protect the climate, reduce pollution from power plants, create jobs, and grow the regional economy by proposing a stronger future for the popular and successful Regional Greenhouse Gas Initiative (RGGI). A stronger RGGI program saves people's lives and families and businesses money. It means a cleaner environment and more prosperous communities.

As you commit to reduce pollution limits from big power plants by 30% from 2020 to 2030, please make sure the benefits support those who have been most overburdened by that pollution and underserved by regional economic opportunities. Please close the loophole that allows large plants composed of many small units to avoid paying for their pollution and invest more in communities on the frontlines of pollution, climate disruption, and poverty.

In addition, I encourage you to apply the lessons learned from the RGGI program to help limit, price, and reduce climate pollution from transportation and heating fuels as well. Without a path to drive pollution reductions from these sectors, we will not be able to achieve our climate goals. Thank you.

Sincerely,

Amanda Scuder  
175 W 92nd St Apt 6D  
New York, NY 10025

As you commit to reduce pollution limits from big power plants by 30% from 2020 to 2030, please make sure the benefits support those who have been most overburdened by that pollution and underserved by regional economic opportunities. Please close the loophole that allows large plants composed of many small units to avoid paying for their pollution and invest more in communities on the frontlines of pollution, climate disruption, and poverty.

In addition, I encourage you to apply the lessons learned from the RGGI program to help limit, price, and reduce climate pollution from transportation and heating fuels as well. Without a path to drive pollution reductions from these sectors, we will not be able to achieve our climate goals. Thank you.

Sincerely,

Charles Grant Walker  
71 Philadelphia St  
Teaticket, MA 2536

Dear Commissioners,

Thank you for joining together to protect the climate, reduce pollution from power plants, create jobs, and grow the regional economy by proposing a stronger future for the popular and successful Regional Greenhouse Gas Initiative (RGGI). A stronger RGGI program saves people's lives and families and businesses money. It means a cleaner environment and more prosperous communities.

As you commit to reduce pollution limits from big power plants by 30% from 2020 to 2030, please make sure the benefits support those who have been most overburdened by that pollution and underserved by regional economic opportunities. Brooklyn, NY 11209

Dear Commissioners,

Thank you for joining together to protect the climate, reduce pollution from power plants, create jobs, and grow the regional economy by proposing a stronger future for the popular and successful Regional Greenhouse Gas Initiative (RGGI). A stronger RGGI program saves people's lives and families and businesses money. It means a cleaner environment and more prosperous communities.

As you commit to reduce pollution limits from big power plants by 30% from 2020 to 2030, please make sure the benefits support those who have been most overburdened by that pollution and underserved by regional economic opportunities. Please close the loophole that allows large plants composed of many small units to avoid paying for their pollution and invest more in communities on the frontlines of pollution, climate disruption, and poverty.

In addition, I encourage you to apply the lessons learned from the RGGI program to help limit, price, and reduce climate pollution from transportation and heating fuels as well. Without a path to drive pollution reductions from these sectors, we will not be able to achieve our climate goals. Thank you.

Sincerely,

Patrick Allen  
101 W 55th St  
New York, NY 10019

Please close the loophole that allows large plants composed of many small units to avoid paying for their pollution and invest more in communities on the frontlines of pollution, climate disruption, and poverty.

In addition, I encourage you to apply the lessons learned from the RGGI program to help limit, price, and reduce climate pollution from transportation and heating fuels as well. Without a path to drive pollution reductions from these sectors, we will not be able to achieve our climate goals. Thank you.

Sincerely,

Noelene Hutchinson

Poughquag, NY 12570

Dear Commissioners,

Thank you for joining together to protect the climate, reduce pollution from power plants, create jobs, and grow the regional economy by proposing a stronger future for the popular and successful Regional Greenhouse Gas Initiative (RGGI). A stronger RGGI program saves people's lives and families and businesses money. It means a cleaner environment and more prosperous communities.

As you commit to reduce pollution limits from big power plants by 30% from 2020 to 2030, please make sure the benefits support those who have been most overburdened by that pollution and underserved by regional economic opportunities. Please close the loophole that allows large plants composed of many small units to avoid paying for their pollution and invest more in communities on the frontlines of pollution, climate disruption, and poverty.

In addition, I encourage you to apply the lessons learned from the RGGI program to help limit, price, and reduce climate pollution from transportation and heating fuels as well. Without a path to drive pollution reductions from these sectors, we will not be able to achieve our climate goals. Thank you.

Dear Commissioners,

Thank you for joining together to protect the climate, reduce pollution from power plants, create jobs, and grow the regional economy by proposing a stronger future for the popular and successful Regional Greenhouse Gas Initiative (RGGI). A stronger RGGI program saves people's lives and families and businesses money. It means a cleaner environment and more prosperous communities.

As you commit to reduce pollution limits from big power plants by 30% from 2020 to 2030, please make sure the benefits support those who have been most overburdened by that pollution and underserved by regional economic opportunities. Please close the loophole that allows large plants composed of many small units to avoid paying for their pollution and invest more in communities on the frontlines of pollution, climate disruption, and poverty.

In addition, I encourage you to apply the lessons learned from the RGGI program to help limit, price, and reduce climate pollution from transportation and heating fuels as well. Without a path to drive pollution reductions from these sectors, we will not be able to achieve our climate goals. Thank you.

Sincerely,

Carol Collins  
1935 Nault Rd  
Dover, DE 19904

As you commit to reduce pollution limits from big power plants by 30% from 2020 to 2030, please make sure the benefits support those who have been most overburdened by that pollution and underserved by regional economic opportunities. Please close the loophole that allows large plants composed of many small units to avoid paying for their pollution and invest more in communities on the frontlines of pollution, climate disruption, and poverty.

In addition, I encourage you to apply the lessons learned from the RGGI program to help limit, price, and reduce climate pollution from transportation and heating fuels as well. Without a path to drive pollution reductions from these sectors, we will not be able to achieve our climate goals. Thank you.

Sincerely,

Eliot Moss

Dear Commissioners,

Thank you for joining together to protect the climate, reduce pollution from power plants, create jobs, and grow the regional economy by proposing a stronger future for the popular and successful Regional Greenhouse Gas Initiative (RGGI). A stronger RGGI program saves people's lives and families and businesses money. It means a cleaner environment and more prosperous communities.

As you commit to reduce pollution limits from big power plants by 30% from 2020 to 2030, please make sure the benefits support those who have been most overburdened by that pollution and underserved by regional economic opportunities. Somerville, MA 2143

Dear Commissioners,

Thank you for joining together to protect the climate, reduce pollution from power plants, create jobs, and grow the regional economy by proposing a stronger future for the popular and successful Regional Greenhouse Gas Initiative (RGGI). A stronger RGGI program saves people's lives and families and businesses money. It means a cleaner environment and more prosperous communities.

As you commit to reduce pollution limits from big power plants by 30% from 2020 to 2030, please make sure the benefits support those who have been most overburdened by that pollution and underserved by regional economic opportunities. Please close the loophole that allows large plants composed of many small units to avoid paying for their pollution and invest more in communities on the frontlines of pollution, climate disruption, and poverty.

In addition, I encourage you to apply the lessons learned from the RGGI program to help limit, price, and reduce climate pollution from transportation and heating fuels as well. Without a path to drive pollution reductions from these sectors, we will not be able to achieve our climate goals. Thank you.

Sincerely,

George Wood  
13 White Plains Dr  
Nashua, NH 3062

Please close the loophole that allows large plants composed of many small units to avoid paying for their pollution and invest more in communities on the frontlines of pollution, climate disruption, and poverty.

In addition, I encourage you to apply the lessons learned from the RGGI program to help limit, price, and reduce climate pollution from transportation and heating fuels as well. Without a path to drive pollution reductions from these sectors, we will not be able to achieve our climate goals. Thank you.

Sincerely,

Ian Blackman

Chichester, NH 3258

Dear Commissioners,

Thank you for joining together to protect the climate, reduce pollution from power plants, create jobs, and grow the regional economy by proposing a stronger future for the popular and successful Regional Greenhouse Gas Initiative (RGGI). A stronger RGGI program saves people's lives and families and businesses money. It means a cleaner environment and more prosperous communities.

As you commit to reduce pollution limits from big power plants by 30% from 2020 to 2030, please make sure the benefits support those who have been most overburdened by that pollution and underserved by regional economic opportunities. Please close the loophole that allows large plants composed of many small units to avoid paying for their pollution and invest more in communities on the frontlines of pollution, climate disruption, and poverty.

In addition, I encourage you to apply the lessons learned from the RGGI program to help limit, price, and reduce climate pollution from transportation and heating fuels as well. Without a path to drive pollution reductions from these sectors, we will not be able to achieve our climate goals. Thank you.

Sincerely,

Dear Commissioners,

Thank you for joining together to protect the climate, reduce pollution from power plants, create jobs, and grow the regional economy by proposing a stronger future for the popular and successful Regional Greenhouse Gas Initiative (RGGI). A stronger RGGI program saves people's lives and families and businesses money. It means a cleaner environment and more prosperous communities.

As you commit to reduce pollution limits from big power plants by 30% from 2020 to 2030, please make sure the benefits support those who have been most overburdened by that pollution and underserved by regional economic opportunities. Please close the loophole that allows large plants composed of many small units to avoid paying for their pollution and invest more in communities on the frontlines of pollution, climate disruption, and poverty.

In addition, I encourage you to apply the lessons learned from the RGGI program to help limit, price, and reduce climate pollution from transportation and heating fuels as well. Without a path to drive pollution reductions from these sectors, we will not be able to achieve our climate goals. Thank you.

Sincerely,

Linnell Krikorian  
10 Old Orchard Way  
Manchester, NH 3103

As you commit to reduce pollution limits from big power plants by 30% from 2020 to 2030, please make sure the benefits support those who have been most overburdened by that pollution and underserved by regional economic opportunities. Please close the loophole that allows large plants composed of many small units to avoid paying for their pollution and invest more in communities on the frontlines of pollution, climate disruption, and poverty.

In addition, I encourage you to apply the lessons learned from the RGGI program to help limit, price, and reduce climate pollution from transportation and heating fuels as well. Without a path to drive pollution reductions from these sectors, we will not be able to achieve our climate goals. Thank you.

Sincerely,

Darrah Wagner  
361 North Rd  
Winterport, ME 4496

Dear Commissioners,

Thank you for joining together to protect the climate, reduce pollution from power plants, create jobs, and grow the regional economy by proposing a stronger future for the popular and successful Regional Greenhouse Gas Initiative (RGGI). A stronger RGGI program saves people's lives and families and businesses money. It means a cleaner environment and more prosperous communities.

As you commit to reduce pollution limits from big power plants by 30% from 2020 to 2030, please make sure the benefits support those who have been most overburdened by that pollution and underserved by regional economic opportunities. Middletown, CT 6457

Dear Commissioners,

Thank you for joining together to protect the climate, reduce pollution from power plants, create jobs, and grow the regional economy by proposing a stronger future for the popular and successful Regional Greenhouse Gas Initiative (RGGI). A stronger RGGI program saves people's lives and families and businesses money. It means a cleaner environment and more prosperous communities.

As you commit to reduce pollution limits from big power plants by 30% from 2020 to 2030, please make sure the benefits support those who have been most overburdened by that pollution and underserved by regional economic opportunities. Please close the loophole that allows large plants composed of many small units to avoid paying for their pollution and invest more in communities on the frontlines of pollution, climate disruption, and poverty.

In addition, I encourage you to apply the lessons learned from the RGGI program to help limit, price, and reduce climate pollution from transportation and heating fuels as well. Without a path to drive pollution reductions from these sectors, we will not be able to achieve our climate goals. Thank you.

Sincerely,

Helene Bank  
174 Putnam Ave # 1  
Cambridge, MA 2139

As you commit to reduce pollution limits from big power plants by 30% from 2020 to 2030, please make sure the benefits support those who have been most overburdened by that pollution and underserved by regional economic opportunities. Please close the loophole that allows large plants composed of many small units to avoid paying for their pollution and invest more in communities on the frontlines of pollution, climate disruption, and poverty.

In addition, I encourage you to apply the lessons learned from the RGGI program to help limit, price, and reduce climate pollution from transportation and heating fuels as well. Without a path to drive pollution reductions from these sectors, we will not be able to achieve our climate goals. Thank you.

Sincerely,

Alex Brown  
432 Johnson Rd  
East Montpelier, VT 5651

Dear Commissioners,

Thank you for joining together to protect the climate, reduce pollution from power plants, create jobs, and grow the regional economy by proposing a stronger future for the popular and successful Regional Greenhouse Gas Initiative (RGGI). A stronger RGGI program saves people's lives and families and businesses money. It means a cleaner environment and more prosperous communities.

As you commit to reduce pollution limits from big power plants by 30% from 2020 to 2030, please make sure the benefits support those who have been most overburdened by that pollution and underserved by regional economic opportunities. Glen Cove, NY 11542

Dear Commissioners,

Thank you for joining together to protect the climate, reduce pollution from power plants, create jobs, and grow the regional economy by proposing a stronger future for the popular and successful Regional Greenhouse Gas Initiative (RGGI). A stronger RGGI program saves people's lives and families and businesses money. It means a cleaner environment and more prosperous communities.

As you commit to reduce pollution limits from big power plants by 30% from 2020 to 2030, please make sure the benefits support those who have been most overburdened by that pollution and underserved by regional economic opportunities. Please close the loophole that allows large plants composed of many small units to avoid paying for their pollution and invest more in communities on the frontlines of pollution, climate disruption, and poverty.

In addition, I encourage you to apply the lessons learned from the RGGI program to help limit, price, and reduce climate pollution from transportation and heating fuels as well. Without a path to drive pollution reductions from these sectors, we will not be able to achieve our climate goals. Thank you.

Sincerely,

Mary De Spirt  
73 Endicott Dr  
Amherst, NY 14226

As you commit to reduce pollution limits from big power plants by 30% from 2020 to 2030, please make sure the benefits support those who have been most overburdened by that pollution and underserved by regional economic opportunities. Please close the loophole that allows large plants composed of many small units to avoid paying for their pollution and invest more in communities on the frontlines of pollution, climate disruption, and poverty.

In addition, I encourage you to apply the lessons learned from the RGGI program to help limit, price, and reduce climate pollution from transportation and heating fuels as well. Without a path to drive pollution reductions from these sectors, we will not be able to achieve our climate goals. Thank you.

Sincerely,

Eileen Entin  
104 Blossomcrest Rd  
Lexington, MA 2421

Dear Commissioners,

Thank you for joining together to protect the climate, reduce pollution from power plants, create jobs, and grow the regional economy by proposing a stronger future for the popular and successful Regional Greenhouse Gas Initiative (RGGI). A stronger RGGI program saves people's lives and families and businesses money. It means a cleaner environment and more prosperous communities.

As you commit to reduce pollution limits from big power plants by 30% from 2020 to 2030, please make sure the benefits support those who have been most overburdened by that pollution and underserved by regional economic opportunities. Please close the loophole that allows large plants composed of many small units to avoid paying for their pollution and invest more in communities on the frontlines of pollution, climate disruption, and poverty.

Dear Commissioners,

Thank you for joining together to protect the climate, reduce pollution from power plants, create jobs, and grow the regional economy by proposing a stronger future for the popular and successful Regional Greenhouse Gas Initiative (RGGI). A stronger RGGI program saves people's lives and families and businesses money. It means a cleaner environment and more prosperous communities.

As you commit to reduce pollution limits from big power plants by 30% from 2020 to 2030, please make sure the benefits support those who have been most overburdened by that pollution and underserved by regional economic opportunities. Please close the loophole that allows large plants composed of many small units to avoid paying for their pollution and invest more in communities on the frontlines of pollution, climate disruption, and poverty.

In addition, I encourage you to apply the lessons learned from the RGGI program to help limit, price, and reduce climate pollution from transportation and heating fuels as well. Without a path to drive pollution reductions from these sectors, we will not be able to achieve our climate goals. Thank you.

Sincerely,

Cheryl Alison

Thank you for joining together to protect the climate, reduce pollution from power plants, create jobs, and grow the regional economy by proposing a stronger future for the popular and successful Regional Greenhouse Gas Initiative (RGGI). A stronger RGGI program saves people's lives and families and businesses money. It means a cleaner environment and more prosperous communities.

As you commit to reduce pollution limits from big power plants by 30% from 2020 to 2030, please make sure the benefits support those who have been most overburdened by that pollution and underserved by regional economic opportunities. Please close the loophole that allows large plants composed of many small units to avoid paying for their pollution and invest more in communities on the frontlines of pollution, climate disruption, and poverty.

In addition, I encourage you to apply the lessons learned from the RGGI program to help limit, price, and reduce climate pollution from transportation and heating fuels as well. Without a path to drive pollution reductions from these sectors, we will not be able to achieve our climate goals. Thank you.

Sincerely,

Elizabeth Poteet  
120 Park St  
Canandaigua, NY 14424

Please close the loophole that allows large plants composed of many small units to avoid paying for their pollution and invest more in communities on the frontlines of pollution, climate disruption, and poverty.

In addition, I encourage you to apply the lessons learned from the RGGI program to help limit, price, and reduce climate pollution from transportation and heating fuels as well. Without a path to drive pollution reductions from these sectors, we will not be able to achieve our climate goals. Thank you.

Sincerely,

Aileen Mcevoy  
191 W Pine St  
Waverly, NY 14892

Dear Commissioners,

Thank you for joining together to protect the climate, reduce pollution from power plants, create jobs, and grow the regional economy by proposing a stronger future for the popular and successful Regional Greenhouse Gas Initiative (RGGI). A stronger RGGI program saves people's lives and families and businesses money. It means a cleaner environment and more prosperous communities.

As you commit to reduce pollution limits from big power plants by 30% from 2020 to 2030, please make sure the benefits support those who have been most overburdened by that pollution and underserved by regional economic opportunities. Please close the loophole that allows large plants composed of many small units to avoid paying for their pollution and invest more in communities on the frontlines of pollution, climate disruption, and poverty.

In addition, I encourage you to apply the lessons learned from the RGGI program to help limit, price, and reduce climate pollution from transportation and heating fuels as well. Without a path to drive pollution reductions from these sectors, we will not be able to achieve our climate goals. Thank you.

Dear Commissioners,

Thank you for joining together to protect the climate, reduce pollution from power plants, create jobs, and grow the regional economy by proposing a stronger future for the popular and successful Regional Greenhouse Gas Initiative (RGGI). A stronger RGGI program saves people's lives and families and businesses money. It means a cleaner environment and more prosperous communities.

As you commit to reduce pollution limits from big power plants by 30% from 2020 to 2030, please make sure the benefits support those who have been most overburdened by that pollution and underserved by regional economic opportunities. Please close the loophole that allows large plants composed of many small units to avoid paying for their pollution and invest more in communities on the frontlines of pollution, climate disruption, and poverty.

In addition, I encourage you to apply the lessons learned from the RGGI program to help limit, price, and reduce climate pollution from transportation and heating fuels as well. Without a path to drive pollution reductions from these sectors, we will not be able to achieve our climate goals. Thank you.

Sincerely,

Bernard O'Neil  
163 Castle Creek Rd # 163  
Binghamton, NY 13901

As you commit to reduce pollution limits from big power plants by 30% from 2020 to 2030, please make sure the benefits support those who have been most overburdened by that pollution and underserved by regional economic opportunities. Please close the loophole that allows large plants composed of many small units to avoid paying for their pollution and invest more in communities on the frontlines of pollution, climate disruption, and poverty.

In addition, I encourage you to apply the lessons learned from the RGGI program to help limit, price, and reduce climate pollution from transportation and heating fuels as well. Without a path to drive pollution reductions from these sectors, we will not be able to achieve our climate goals. Thank you.

Sincerely,

Cynthia Dawson

Annapolis, MD 21403

Dear Commissioners,

Thank you for joining together to protect the climate, reduce pollution from power plants, create jobs, and grow the regional economy by proposing a stronger future for the popular and successful Regional Greenhouse Gas Initiative (RGGI). A stronger RGGI program saves people's lives and families and businesses money. It means a cleaner environment and more prosperous communities.

As you commit to reduce pollution limits from big power plants by 30% from 2020 to 2030, please make sure the benefits support those who have been most overburdened by that pollution and underserved by regional economic opportunities. Please close the loophole that allows large plants composed of many small units to avoid paying for their pollution and invest more in communities on the frontlines of pollution, climate disruption, and poverty.

New York, NY 10023

Dear Commissioners,

Thank you for joining together to protect the climate, reduce pollution from power plants, create jobs, and grow the regional economy by proposing a stronger future for the popular and successful Regional Greenhouse Gas Initiative (RGGI). A stronger RGGI program saves people's lives and families and businesses money. It means a cleaner environment and more prosperous communities.

As you commit to reduce pollution limits from big power plants by 30% from 2020 to 2030, please make sure the benefits support those who have been most overburdened by that pollution and underserved by regional economic opportunities. Please close the loophole that allows large plants composed of many small units to avoid paying for their pollution and invest more in communities on the frontlines of pollution, climate disruption, and poverty.

In addition, I encourage you to apply the lessons learned from the RGGI program to help limit, price, and reduce climate pollution from transportation and heating fuels as well. Without a path to drive pollution reductions from these sectors, we will not be able to achieve our climate goals. Thank you.

Sincerely,

Barbara Rogers  
1000 Sand St  
Brier Hill, NY 13614

A stronger RGGI program saves people's lives and families and businesses money. It means a cleaner environment and more prosperous communities.

As you commit to reduce pollution limits from big power plants by 30% from 2020 to 2030, please make sure the benefits support those who have been most overburdened by that pollution and underserved by regional economic opportunities. Please close the loophole that allows large plants composed of many small units to avoid paying for their pollution and invest more in communities on the frontlines of pollution, climate disruption, and poverty.

In addition, I encourage you to apply the lessons learned from the RGGI program to help limit, price, and reduce climate pollution from transportation and heating fuels as well. Without a path to drive pollution reductions from these sectors, we will not be able to achieve our climate goals. Thank you.

Sincerely,

Noa Shapiro-Tamir  
4088 Garrett Rd  
Ithaca, NY 14850

Dear Commissioners,

Thank you for joining together to protect the climate, reduce pollution from power plants, create jobs, and grow the regional economy by proposing a stronger future for the popular and successful Regional Greenhouse Gas Initiative (RGGI). A stronger RGGI program saves people's lives and families and businesses money. It means a cleaner environment and more prosperous communities.

As you commit to reduce pollution limits from big power plants by 30% from 2020 to 2030, please make sure the benefits support those who have been most overburdened by that pollution and underserved by regional economic opportunities. Please close the loophole that allows large plants composed of many small units to avoid paying for their pollution and invest more in communities on the frontlines of pollution, climate disruption, and poverty.

In addition, I encourage you to apply the lessons learned from the RGGI program to help limit, price, and reduce climate pollution from transportation and heating fuels as well. Please close the loophole that allows large plants composed of many small units to avoid paying for their pollution and invest more in communities on the frontlines of pollution, climate disruption, and poverty.

In addition, I encourage you to apply the lessons learned from the RGGI program to help limit, price, and reduce climate pollution from transportation and heating fuels as well. Without a path to drive pollution reductions from these sectors, we will not be able to achieve our climate goals. Thank you.

Sincerely,

Sally Yost

Baltimore, MD 21212

Dear Commissioners,

Thank you for joining together to protect the climate, reduce pollution from power plants, create jobs, and grow the regional economy by proposing a stronger future for the popular and successful Regional Greenhouse Gas Initiative (RGGI). A stronger RGGI program saves people's lives and families and businesses money. It means a cleaner environment and more prosperous communities.

As you commit to reduce pollution limits from big power plants by 30% from 2020 to 2030, please make sure the benefits support those who have been most overburdened by that pollution and underserved by regional economic opportunities. Please close the loophole that allows large plants composed of many small units to avoid paying for their pollution and invest more in communities on the frontlines of pollution, climate disruption, and poverty.

In addition, I encourage you to apply the lessons learned from the RGGI program to help limit, price, and reduce climate pollution from transportation and heating fuels as well. Without a path to drive pollution reductions from these sectors, we will not be able to achieve our climate goals. Thank you.

Sincerely,

Little Neck, NY 11362

Dear Commissioners,

Thank you for joining together to protect the climate, reduce pollution from power plants, create jobs, and grow the regional economy by proposing a stronger future for the popular and successful Regional Greenhouse Gas Initiative (RGGI). A stronger RGGI program saves people's lives and families and businesses money. It means a cleaner environment and more prosperous communities.

As you commit to reduce pollution limits from big power plants by 30% from 2020 to 2030, please make sure the benefits support those who have been most overburdened by that pollution and underserved by regional economic opportunities. Please close the loophole that allows large plants composed of many small units to avoid paying for their pollution and invest more in communities on the frontlines of pollution, climate disruption, and poverty.

In addition, I encourage you to apply the lessons learned from the RGGI program to help limit, price, and reduce climate pollution from transportation and heating fuels as well. Without a path to drive pollution reductions from these sectors, we will not be able to achieve our climate goals. Thank you.

Sincerely,

Alex Cicale  
150 Stoll Rd  
Saugerties, NY 12477

As you commit to reduce pollution limits from big power plants by 30% from 2020 to 2030, please make sure the benefits support those who have been most overburdened by that pollution and underserved by regional economic opportunities. Please close the loophole that allows large plants composed of many small units to avoid paying for their pollution and invest more in communities on the frontlines of pollution, climate disruption, and poverty.

In addition, I encourage you to apply the lessons learned from the RGGI program to help limit, price, and reduce climate pollution from transportation and heating fuels as well. Without a path to drive pollution reductions from these sectors, we will not be able to achieve our climate goals. Thank you.

Sincerely,

Elaine Livingston

Vestal, NY 13850

Dear Commissioners,

Thank you for joining together to protect the climate, reduce pollution from power plants, create jobs, and grow the regional economy by proposing a stronger future for the popular and successful Regional Greenhouse Gas Initiative (RGGI). A stronger RGGI program saves people's lives and families and businesses money. It means a cleaner environment and more prosperous communities.

As you commit to reduce pollution limits from big power plants by 30% from 2020 to 2030, please make sure the benefits support those who have been most overburdened by that pollution and underserved by regional economic opportunities. Weymouth, MA 2188

Dear Commissioners,

Thank you for joining together to protect the climate, reduce pollution from power plants, create jobs, and grow the regional economy by proposing a stronger future for the popular and successful Regional Greenhouse Gas Initiative (RGGI). A stronger RGGI program saves people's lives and families and businesses money. It means a cleaner environment and more prosperous communities.

As you commit to reduce pollution limits from big power plants by 30% from 2020 to 2030, please make sure the benefits support those who have been most overburdened by that pollution and underserved by regional economic opportunities. Please close the loophole that allows large plants composed of many small units to avoid paying for their pollution and invest more in communities on the frontlines of pollution, climate disruption, and poverty.

In addition, I encourage you to apply the lessons learned from the RGGI program to help limit, price, and reduce climate pollution from transportation and heating fuels as well. Without a path to drive pollution reductions from these sectors, we will not be able to achieve our climate goals. Thank you.

Sincerely,

Leah Santone  
384 Pelham St  
Methuen, MA 1844

A stronger RGGI program saves people's lives and families and businesses money. It means a cleaner environment and more prosperous communities.

As you commit to reduce pollution limits from big power plants by 30% from 2020 to 2030, please make sure the benefits support those who have been most overburdened by that pollution and underserved by regional economic opportunities. Please close the loophole that allows large plants composed of many small units to avoid paying for their pollution and invest more in communities on the frontlines of pollution, climate disruption, and poverty.

In addition, I encourage you to apply the lessons learned from the RGGI program to help limit, price, and reduce climate pollution from transportation and heating fuels as well. Without a path to drive pollution reductions from these sectors, we will not be able to achieve our climate goals. Thank you.

Sincerely,

James Willsey  
15 Eleanor Dr

Hanover, NH 3755

Dear Commissioners,

Thank you for joining together to protect the climate, reduce pollution from power plants, create jobs, and grow the regional economy by proposing a stronger future for the popular and successful Regional Greenhouse Gas Initiative (RGGI). A stronger RGGI program saves people's lives and families and businesses money. It means a cleaner environment and more prosperous communities.

As you commit to reduce pollution limits from big power plants by 30% from 2020 to 2030, please make sure the benefits support those who have been most overburdened by that pollution and underserved by regional economic opportunities. Please close the loophole that allows large plants composed of many small units to avoid paying for their pollution and invest more in communities on the frontlines of pollution, climate disruption, and poverty.

In addition, I encourage you to apply the lessons learned from the RGGI program to help limit, price, and reduce climate pollution from transportation and heating fuels as well. Without a path to drive pollution reductions from these sectors, we will not be able to achieve our climate goals. Thank you.

Sincerely,

Jane Conboy  
58 Center St Apt 1-5  
Dennisport, MA 2639

Please close the loophole that allows large plants composed of many small units to avoid paying for their pollution and invest more in communities on the frontlines of pollution, climate disruption, and poverty.

In addition, I encourage you to apply the lessons learned from the RGGI program to help limit, price, and reduce climate pollution from transportation and heating fuels as well. Without a path to drive pollution reductions from these sectors, we will not be able to achieve our climate goals. Thank you.

Sincerely,

Richard Davis

Lake Placid, NY 12946

Dear Commissioners,

Thank you for joining together to protect the climate, reduce pollution from power plants, create jobs, and grow the regional economy by proposing a stronger future for the popular and successful Regional Greenhouse Gas Initiative (RGGI). A stronger RGGI program saves people's lives and families and businesses money. It means a cleaner environment and more prosperous communities.

As you commit to reduce pollution limits from big power plants by 30% from 2020 to 2030, please make sure the benefits support those who have been most overburdened by that pollution and underserved by regional economic opportunities. Please close the loophole that allows large plants composed of many small units to avoid paying for their pollution and invest more in communities on the frontlines of pollution, climate disruption, and poverty.

In addition, I encourage you to apply the lessons learned from the RGGI program to help limit, price, and reduce climate pollution from transportation and heating fuels as well. Without a path to drive pollution reductions from these sectors, we will not be able to achieve our climate goals. Thank you.

Dear Commissioners,

Thank you for joining together to protect the climate, reduce pollution from power plants, create jobs, and grow the regional economy by proposing a stronger future for the popular and successful Regional Greenhouse Gas Initiative (RGGI). A stronger RGGI program saves people's lives and families and businesses money. It means a cleaner environment and more prosperous communities.

As you commit to reduce pollution limits from big power plants by 30% from 2020 to 2030, please make sure the benefits support those who have been most overburdened by that pollution and underserved by regional economic opportunities. Please close the loophole that allows large plants composed of many small units to avoid paying for their pollution and invest more in communities on the frontlines of pollution, climate disruption, and poverty.

In addition, I encourage you to apply the lessons learned from the RGGI program to help limit, price, and reduce climate pollution from transportation and heating fuels as well. Without a path to drive pollution reductions from these sectors, we will not be able to achieve our climate goals. Thank you.

Sincerely,

Valerie Faden  
24 Beach Plum Drive  
Millville, DE 19967

As you commit to reduce pollution limits from big power plants by 30% from 2020 to 2030, please make sure the benefits support those who have been most overburdened by that pollution and underserved by regional economic opportunities. Please close the loophole that allows large plants composed of many small units to avoid paying for their pollution and invest more in communities on the frontlines of pollution, climate disruption, and poverty.

In addition, I encourage you to apply the lessons learned from the RGGI program to help limit, price, and reduce climate pollution from transportation and heating fuels as well. Without a path to drive pollution reductions from these sectors, we will not be able to achieve our climate goals. Thank you.

Sincerely,

Roanne Oranch

Newton, MA 2461

Dear Commissioners,

Thank you for joining together to protect the climate, reduce pollution from power plants, create jobs, and grow the regional economy by proposing a stronger future for the popular and successful Regional Greenhouse Gas Initiative (RGGI). A stronger RGGI program saves people's lives and families and businesses money. It means a cleaner environment and more prosperous communities.

As you commit to reduce pollution limits from big power plants by 30% from 2020 to 2030, please make sure the benefits support those who have been most overburdened by that pollution and underserved by regional economic opportunities. Dear Commissioners,

Thank you for joining together to protect the climate, reduce pollution from power plants, create jobs, and grow the regional economy by proposing a stronger future for the popular and successful Regional Greenhouse Gas Initiative (RGGI). A stronger RGGI program saves people's lives and families and businesses money. It means a cleaner environment and more prosperous communities.

As you commit to reduce pollution limits from big power plants by 30% from 2020 to 2030, please make sure the benefits support those who have been most overburdened by that pollution and underserved by regional economic opportunities. Please close the loophole that allows large plants composed of many small units to avoid paying for their pollution and invest more in communities on the frontlines of pollution, climate disruption, and poverty.

In addition, I encourage you to apply the lessons learned from the RGGI program to help limit, price, and reduce climate pollution from transportation and heating fuels as well. Without a path to drive pollution reductions from these sectors, we will not be able to achieve our climate goals. Thank you.

Sincerely,

Michael Fegan  
150 Main St  
Nanuet, NY 10954

As you commit to reduce pollution limits from big power plants by 30% from 2020 to 2030, please make sure the benefits support those who have been most overburdened by that pollution and underserved by regional economic opportunities. Please close the loophole that allows large plants composed of many small units to avoid paying for their pollution and invest more in communities on the frontlines of pollution, climate disruption, and poverty.

In addition, I encourage you to apply the lessons learned from the RGGI program to help limit, price, and reduce climate pollution from transportation and heating fuels as well. Without a path to drive pollution reductions from these sectors, we will not be able to achieve our climate goals. Thank you.

Sincerely,

Cynthia Turton

Tonawanda, NY 14150

Dear Commissioners,

Thank you for joining together to protect the climate, reduce pollution from power plants, create jobs, and grow the regional economy by proposing a stronger future for the popular and successful Regional Greenhouse Gas Initiative (RGGI). A stronger RGGI program saves people's lives and families and businesses money. It means a cleaner environment and more prosperous communities.

As you commit to reduce pollution limits from big power plants by 30% from 2020 to 2030, please make sure the benefits support those who have been most overburdened by that pollution and underserved by regional economic opportunities. Brookline, MA 2446

Dear Commissioners,

Thank you for joining together to protect the climate, reduce pollution from power plants, create jobs, and grow the regional economy by proposing a stronger future for the popular and successful Regional Greenhouse Gas Initiative (RGGI). A stronger RGGI program saves people's lives and families and businesses money. It means a cleaner environment and more prosperous communities.

As you commit to reduce pollution limits from big power plants by 30% from 2020 to 2030, please make sure the benefits support those who have been most overburdened by that pollution and underserved by regional economic opportunities. Please close the loophole that allows large plants composed of many small units to avoid paying for their pollution and invest more in communities on the frontlines of pollution, climate disruption, and poverty.

In addition, I encourage you to apply the lessons learned from the RGGI program to help limit, price, and reduce climate pollution from transportation and heating fuels as well. Without a path to drive pollution reductions from these sectors, we will not be able to achieve our climate goals. Thank you.

Sincerely,

Margaret Comaskey  
1430 Thieriot Ave Apt 4J  
Bronx, NY 10460

As you commit to reduce pollution limits from big power plants by 30% from 2020 to 2030, please make sure the benefits support those who have been most overburdened by that pollution and underserved by regional economic opportunities. Please close the loophole that allows large plants composed of many small units to avoid paying for their pollution and invest more in communities on the frontlines of pollution, climate disruption, and poverty.

In addition, I encourage you to apply the lessons learned from the RGGI program to help limit, price, and reduce climate pollution from transportation and heating fuels as well. Without a path to drive pollution reductions from these sectors, we will not be able to achieve our climate goals. Thank you.

Sincerely,

Joni Pontius

Seneca Falls, NY 13148

Dear Commissioners,

Thank you for joining together to protect the climate, reduce pollution from power plants, create jobs, and grow the regional economy by proposing a stronger future for the popular and successful Regional Greenhouse Gas Initiative (RGGI). A stronger RGGI program saves people's lives and families and businesses money. It means a cleaner environment and more prosperous communities.

As you commit to reduce pollution limits from big power plants by 30% from 2020 to 2030, please make sure the benefits support those who have been most overburdened by that pollution and underserved by regional economic opportunities. Dear Commissioners,

Thank you for joining together to protect the climate, reduce pollution from power plants, create jobs, and grow the regional economy by proposing a stronger future for the popular and successful Regional Greenhouse Gas Initiative (RGGI). A stronger RGGI program saves people's lives and families and businesses money. It means a cleaner environment and more prosperous communities.

As you commit to reduce pollution limits from big power plants by 30% from 2020 to 2030, please make sure the benefits support those who have been most overburdened by that pollution and underserved by regional economic opportunities. Please close the loophole that allows large plants composed of many small units to avoid paying for their pollution and invest more in communities on the frontlines of pollution, climate disruption, and poverty.

In addition, I encourage you to apply the lessons learned from the RGGI program to help limit, price, and reduce climate pollution from transportation and heating fuels as well. Without a path to drive pollution reductions from these sectors, we will not be able to achieve our climate goals. Thank you.

Sincerely,

Karen Kujala  
207 Fairwood Rd Apt J  
Bel Air, MD 21014

A stronger RGGI program saves people's lives and families and businesses money. It means a cleaner environment and more prosperous communities.

As you commit to reduce pollution limits from big power plants by 30% from 2020 to 2030, please make sure the benefits support those who have been most overburdened by that pollution and underserved by regional economic opportunities. Please close the loophole that allows large plants composed of many small units to avoid paying for their pollution and invest more in communities on the frontlines of pollution, climate disruption, and poverty.

In addition, I encourage you to apply the lessons learned from the RGGI program to help limit, price, and reduce climate pollution from transportation and heating fuels as well. Without a path to drive pollution reductions from these sectors, we will not be able to achieve our climate goals. Thank you.

Sincerely,

Laura Livingston

Frederick, MD 21701

Dear Commissioners,

Thank you for joining together to protect the climate, reduce pollution from power plants, create jobs, and grow the regional economy by proposing a stronger future for the popular and successful Regional Greenhouse Gas Initiative (RGGI). A stronger RGGI program saves people's lives and families and businesses money. It means a cleaner environment and more prosperous communities.

As you commit to reduce pollution limits from big power plants by 30% from 2020 to 2030, please make sure the benefits support those who have been most overburdened by that pollution and underserved by regional economic opportunities. Please close the loophole that allows large plants composed of many small units to avoid paying for their pollution and invest more in communities on the frontlines of pollution, climate disruption, and poverty.

In addition, I encourage you to apply the lessons learned from the RGGI program to help limit, price, and reduce climate pollution from transportation and heating fuels as well. Without a path to drive pollution reductions from these sectors, we will not be able to achieve our climate goals. Thank you.

Sincerely,

Sheila Robinson  
9430 Wandering Way  
Columbia, MD 21045

A stronger RGGI program saves people's lives and families and businesses money. It means a cleaner environment and more prosperous communities.

As you commit to reduce pollution limits from big power plants by 30% from 2020 to 2030, please make sure the benefits support those who have been most overburdened by that pollution and underserved by regional economic opportunities. Please close the loophole that allows large plants composed of many small units to avoid paying for their pollution and invest more in communities on the frontlines of pollution, climate disruption, and poverty.

In addition, I encourage you to apply the lessons learned from the RGGI program to help limit, price, and reduce climate pollution from transportation and heating fuels as well. Without a path to drive pollution reductions from these sectors, we will not be able to achieve our climate goals. Thank you.

Sincerely,

Ina Bari

New York, NY 10028

Dear Commissioners,

Thank you for joining together to protect the climate, reduce pollution from power plants, create jobs, and grow the regional economy by proposing a stronger future for the popular and successful Regional Greenhouse Gas Initiative (RGGI). A stronger RGGI program saves people's lives and families and businesses money. It means a cleaner environment and more prosperous communities.

As you commit to reduce pollution limits from big power plants by 30% from 2020 to 2030, please make sure the benefits support those who have been most overburdened by that pollution and underserved by regional economic opportunities. Please close the loophole that allows large plants composed of many small units to avoid paying for their pollution and invest more in communities on the frontlines of pollution, climate disruption, and poverty.

In addition, I encourage you to apply the lessons learned from the RGGI program to help limit, price, and reduce climate pollution from transportation and heating fuels as well. Without a path to drive pollution reductions from these sectors, we will not be able to achieve our climate goals. Thank you.

Sincerely,

David Muir  
2679 Dunbar Woods Rd  
Marcellus, NY 13108

As you commit to reduce pollution limits from big power plants by 30% from 2020 to 2030, please make sure the benefits support those who have been most overburdened by that pollution and underserved by regional economic opportunities. Please close the loophole that allows large plants composed of many small units to avoid paying for their pollution and invest more in communities on the frontlines of pollution, climate disruption, and poverty.

In addition, I encourage you to apply the lessons learned from the RGGI program to help limit, price, and reduce climate pollution from transportation and heating fuels as well. Without a path to drive pollution reductions from these sectors, we will not be able to achieve our climate goals. Thank you.

Sincerely,

Nancy Pirtle-Connelly  
1803 Winans Ave  
Baltimore, MD 21227

Dear Commissioners,

Thank you for joining together to protect the climate, reduce pollution from power plants, create jobs, and grow the regional economy by proposing a stronger future for the popular and successful Regional Greenhouse Gas Initiative (RGGI). A stronger RGGI program saves people's lives and families and businesses money. It means a cleaner environment and more prosperous communities.

As you commit to reduce pollution limits from big power plants by 30% from 2020 to 2030, please make sure the benefits support those who have been most overburdened by that pollution and underserved by regional economic opportunities.
